

CIVIC DIGITAL FELLOWSHIP

Automated statistical products for CJARS data providers

Daniel Schnelbach | Carnegie Mellon University

Economic Reimbursable Surveys Division

Supervised by Keith Finlay

Main project

- **Goal:**
 - Create a national collection of criminal justice microdata for statistical and research purposes
- **Benefit:**
 - Improving the Bureau's data linkage infrastructure

Automated Production System for Statistical Products for Data Providers

CDF project

- **Motivation:**
 - Acknowledge data-providing agencies as stakeholders

How can this be done?

Problem:

What is a scalable way to return something of value to data providers?

Solution:

Automated report production system

Challenges & methods

Challenge #1

Prioritizing disclosure review

Solution:

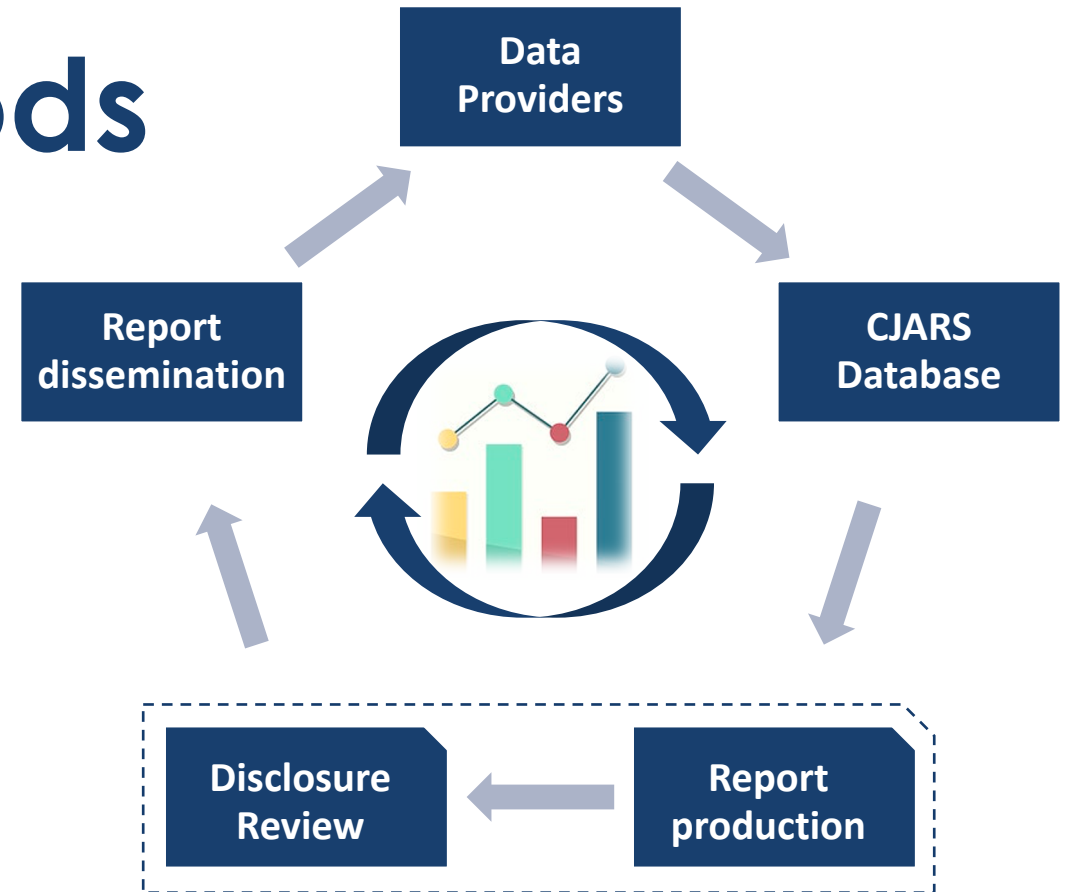

Automated noise-scaling & infusion

Challenge #2

Scalability

Solution:

Parallelization

CDF Project benefits

Efficiency

- **In production...**
 - 3000+ counties across the US
- **...and dissemination**
 - Metadata to facilitate disclosure review

Sustainability

- **An integral link**
 - Supports long-term strategy to provide enough value to all stakeholders

Title 13

- **Improved:**
 - Operations
 - Coverage
 - Measurement

Project status

Complete

Automated program that generated formatted reports

Advancing

Data quality issue identification

Caseloads Report

This report contains aggregate caseload statistics for incarceration cases in Michigan.

Socio-demographic statistics

Table 1: Socio-demographic trends, Male cases

	Male_%	Male_avg_age	Male_Asian_%	Male_Black_%	Male_Hispanic_%	Male_White_%
2012	75	33	0	16	6.67	68
2013	67.74	33	1.48	19.19	13.29	54.62
2014	69.44	34	1.44	20.16	11.52	59.04
2015	68	34	1.47	22.06	11.76	51.47
2016	69	33.5	0	20.29	11.59	55.07
2017	67	33.5	1.49	20.9	14.93	47.76
2018	69.12	34	1.45	21.7	11.57	49.19

Trends in socio-demographic profiles of cases

Next steps

**Optimizing and expanding
the process**

**Increasing statistical
measures and report detail**
